Center for Educational Performance and Information

SSO applications will be migrating to MILogin

In late July, MSDS and EEM will be migrating from Single Sign-On (SSO) to MILogin. MILogin is the new State of Michigan Identity, Credential and Access Management solution. The MILogin solution will provide enhanced SSO capabilities in addition to meeting many other business requirements, security, and compliance needs.

When will the migration occur?
CEPI expects the migration to occur between July 15 and July 18, however that date is subject to change. We will send updates in future CEPI announcements communications if there are any changes to the dates.

What changes should I expect?
1) Authorized users will be directed to a new website where you may login to access MSDS and EEM. The website will be https://milogintp.michigan.gov. If you attempt to login via SSO after the migration, you will receive a message that you are not subscribed to any applications. SSO is scheduled to be phased out completely by October 1, 2016.

2) MILogin uses Multi-Factor Authentication (MFA). MFA is a security feature that will send a special access code to your email, mobile phone (call or text), or work phone if your computer / mobile device has never logged in to MILogin. (You will be able to choose where the access code will be sent.) This feature is used by many financial institutions and e-mail providers (e.g. Gmail, Yahoo, Hotmail, etc) so you may be familiar with it already.

Will I need to fill out a new security form or request a new user ID?
No. If you have an existing SSO username and password prior to the migration, your credentials will be migrated automatically. After the migration takes place, we recommend that you create a new password. You will also need to setup new security questions and answers, as those will not be migrated.

How can I prepare for the migration?
1) Please confirm that your SSO contact information is up to date. To do this, login to https://sso.state.mi.us. Once logged in, click on "Account Maintenance", then click on "Change My Personal Information".

2) Please update any local user documentation to reference the MILogin page instead of SSO once the migration takes place.
